*Those words of yours are serious, dangerous, and unacceptable. Are you trying to shake up the old lions? In no small part, with thanks to you, the news from the Percy Military Hospital in Clamart last month gave us all the opportunity for celebration. Change your words my friend, and we can celebrate your story with the world.*

*This story is extraordinary and compelling, but think seriously before taking the next step. The security services will not support you in this, and they will not contribute to this work. Therefore, also change those names, and you will have our blessings.*

*These are the limits that should not be crossed under any circumstances. You do understand what I am saying? I wish for you all the very best with your book, and your retirement in peace and prosperity.*
